Software developer with 2 years of experience, accustomed to working in international environments. From impactful landing pages and extensive component libraries to multiplatform mobile applications, I bring my knowledge and expertise to any challenging project.

{ professional experience }

// Mobile Applications Developer
AdoptaUnJunior · Full-time · Sept. 2024 – Nov. 2024 · Madrid, España
=> Developed a fully responsive multiplatform mobile application that adapts across various mobile devices.
=> Collaborated with UX/UI team to translate Figma designs into intuitive and functional mobile interfaces.
=> Built 30+ reusable components such as dropdowns, buttons and custom input fields, achieving 25% reduction in styling codebase size and enhancing maintainability.
=> Worked closely with the backend team to integrate APIs, implement real-time functionalities using Socket.io, and manage data flow within the app.
Main technologies: ReactNative · Expo · NativeWind · Socket.io · GitHub · Figma · Trello · Scrum

// Software Engineer Intern
Leads.io · Full-time · Jan 2024 – Apr 2024 · Groningen, Netherlands
=> Contributed to an extensive component library comprising 40+ components, including the development of new components from scratch such as datepicker, chat interface, color and media selector, range slider, and more.
=> Implemented innovative features and designs for existing components, collaborating closely with UI/UX designers to align with user needs.
=> Proactively gathered and implemented UI/UX feedback to refine components and optimize user interactions.
=> Crafted thorough component testing.
=> Orchestrated a comprehensive update of Storybook for the component library.
=> Worked collaboratively with frontend and backend developers to ensure seamless integration of components within the larger applications architecture.
=> Developed an MVP of a dashboard application based on Laravel backend.
=> Engaged in Agile/Scrum methodology, participating in bi-weekly sprints to deliver iterative improvements and meet project milestones.
Main technologies: JavaScript · TypeScript · Vue.js · Scss · BEM · Cypress · Storybook · GitLab · Figma · Jira · Scrum

// Full Stack Web & Mobile Developer
Codenotch · Full-time · Oct 2023 – Jan 2024 · Madrid, Spain
=> Developed JSCODEGAMER (an app for studying and practicing JavaScript) with Angular, Express and MongoDB
https://jscodegamer.vercel.app
https://www.loom.com/share/cc5bf9b206104f21807e8880e24d04fd

// Web Full Stack Developer
OpenBootcamp · Full-time · Sep 2022 – Sep 2023 · Valencia, Spain
=> Developed Task Manager App with React and Bootstrap
https://github.com/katiaku/task-manager
=> Developed Birthday Planner with CakePHP, MySQL and Bootstrap
https://github.com/katiaku/my-birthday
